Query 1- Knowing the number of rental times for each family category

Sum of Rental_count by category_name
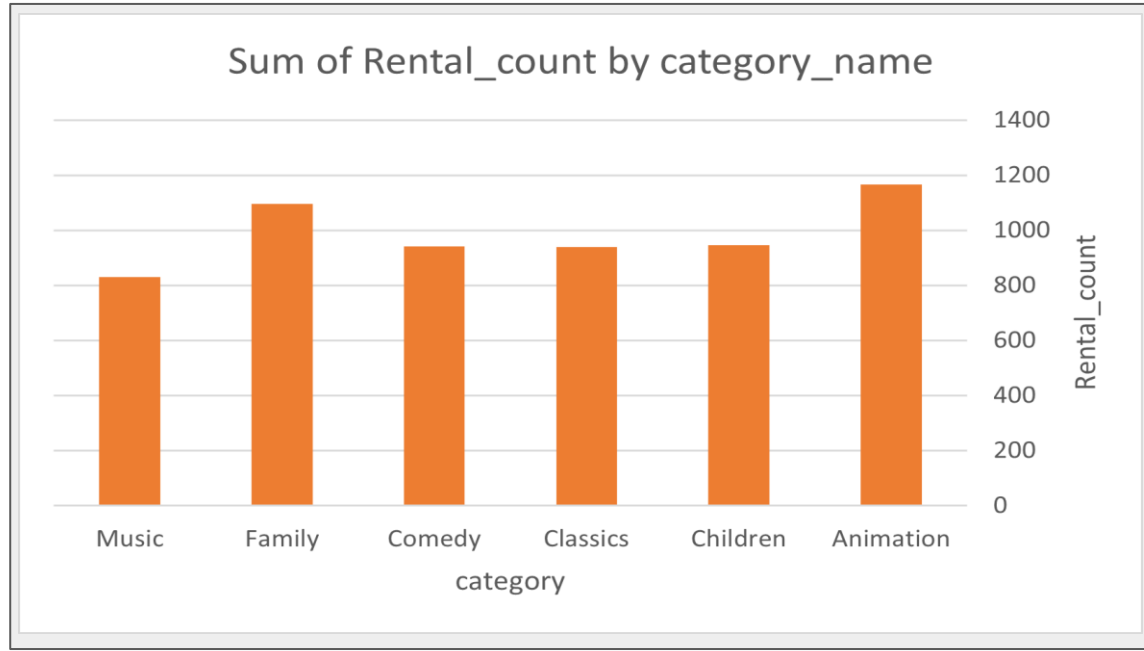

In the graph, we show the number of movie rentals by family-friendly categories. Therefore, animated films and family films are the highest rented.
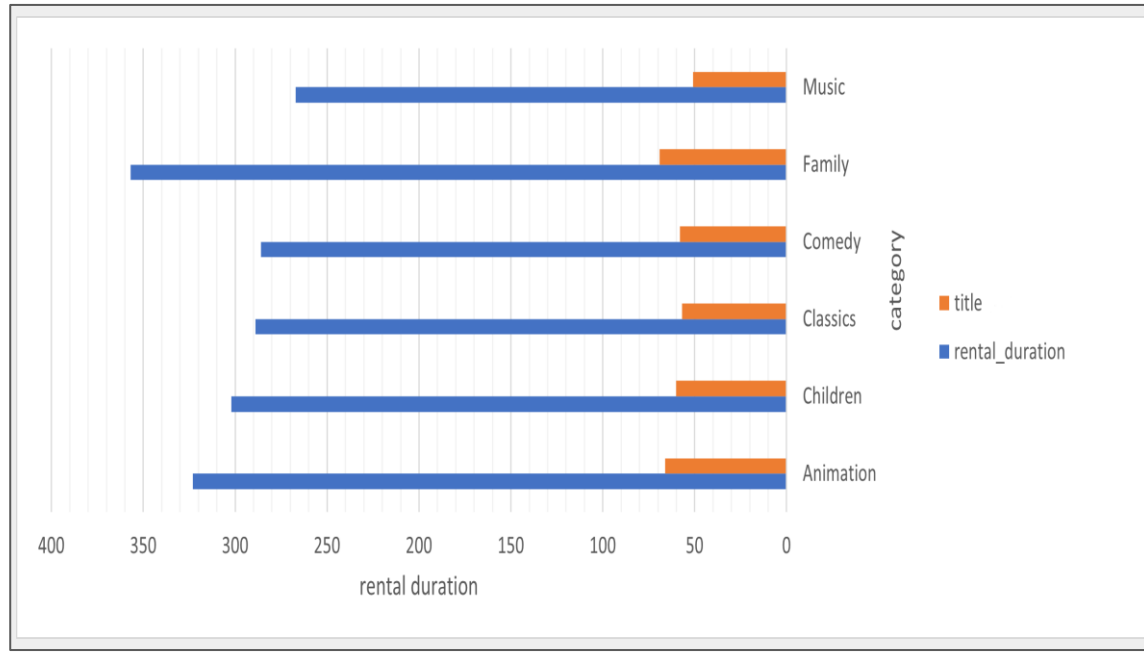

Query 2- Knowing the rent times by month and year for each store.

count_rentals for each store
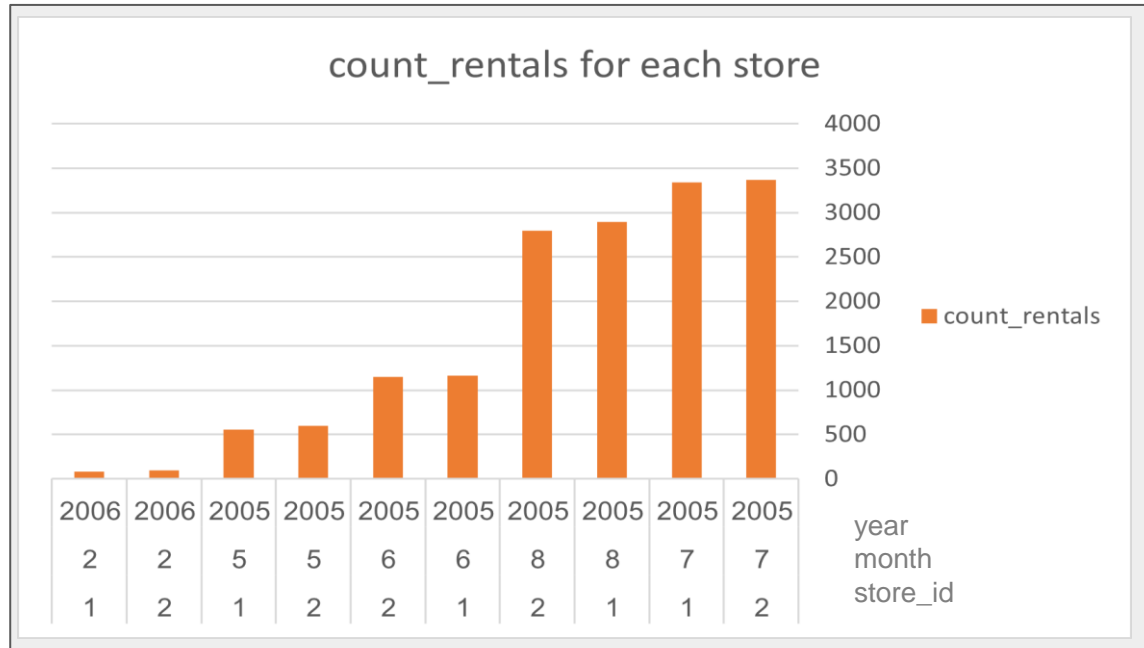

We can see here how much rent each store pays in a month and a year .
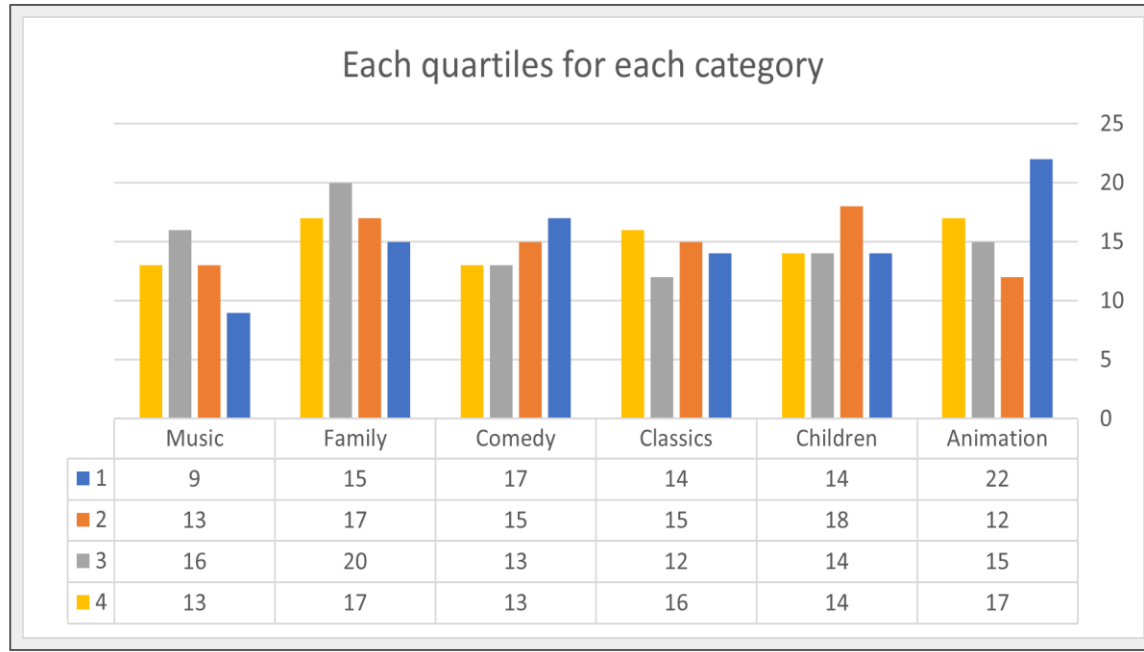

For that store, No. 2 had the highest rent in month 7 of 2005.

Query 3- Knowing the most rented movies for the family by family categories

In this graph, we see that the films that were rented the most to the family according to the appropriate categories were "family", which is the most rented according to all categories.

Query 4- We want to know the number of family category films for each quartile

Each quartiles for each category

	Music	Family	Comedy	Classics	Children	Animation
1	9	15	17	14	14	22
2	13	17	15	15	18	12
3	16	20	13	12	14	15
4	13	17	13	16	14	17

We divided the films into four quarters, according to family categories.

According to the graph shown, we see that in the first quarter, animated films had the highest rise.
